

Building Safety

The Building Safety Department regulates the construction, demolition, and occupancy of all buildings within the unincorporated areas of Gila County. We provide plan review, issue building permits and inspect new construction, additions, and alterations of buildings and structures per the adopted Building Code. Our primary mission is to insure safety while providing a better quality of life for the residents of Gila County. We also perform installation inspections for Manufactured Homes and Factory Built Buildings to insure compliance with Federal and state standards under an agreement with the Arizona Office of Manufactured Housing.

For general information or assistance, please contact us in either our Globe or Payson office.
